## This is Not a Backup. This is the Grid.

Traditional generators are “Standby” units—expensive liabilities that require fuel, oil, and constant maintenance. A Theron Unit is a **Primary Power Asset**.

- **Zero Fuel:** Driven by permanent magnetic propulsion.

- **Asset-Based:** Moving your energy cost from a monthly bill to a Capital Investment.

**Made in the USA**

American company, 100% owned and operated, supporting the domestic workforce while securing the nation's energy future against grid vulnerabilities and Outages.

- Voltages & Frequencies
- Units of Watt
- 5 Year Continuous Warranty
